

Jay Kakadiya - Senior Data Engineer/ETL Developer

Company: Comcast

“ I recommend the iPaaS (Japio) instead of coding”

Would you recommend this iPaaS solution to somebody in your role and why will it help somebody in your role?

Yes I recommend the iPaaS solution

02

How are you currently getting your data into your visualization tool for analysis?

Currently I am writing a python script and send it to tool.

03

How much time to do you spend on data analytics projects?

I spend almost 6hr/day for data analytics

04

How much easier is using our iPaaS compared to hand coding?

I recommend the iPaaS instead of coding

05

How much time could Japio save you from the manual integration task?

It saves almost 60% of time

06

How much easier is using our iPaaS compared to ETL/ESB- they tend to be very complexed and time consuming

It's like few clicks and you are good to go

07

Does the Json & CSV formats make it easier for you to complete analytics projects faster?

yes, but sometimes it's depends on the situation
