

Ryan Agro - Business Intelligence Analyst

“The functionality is awesome, and the best part is that you have such a variety of connectors. Keep up the great work, I definitely see a strong use case for the tech! ”

01

Would you recommend this iPaaS solution to somebody in your role and why will it help somebody in your role?

Yes, I would recommend this solution to someone in my role. It will save them time hand coding in python to clean data and create data models. It is also easy to use and would require a lot less training.

02

How are you currently getting your data into your visualization tool for analysis?

I currently use Power Query for Power Bi and use SQL queries when using Tableau. Sometimes we write sql and python to extract specific data and sometimes we connect straight to the raw data in the databases.

03

How much time do you spend on data analytics projects?

I spend about 20 hours a week.

04

How much easier is using our iPaaS compared to hand coding?

It seems like it is a lot easier and would save time that it takes to debug code and test efficiency.

05

How much time could Japio save you from the manual integration task?

Japio could save us a lot of time from manual integration. I would estimate that it could save hundreds of hours for us.

06

How much easier is using our iPaaS compared to ETL/ESB- they tend to be very complexed and time consuming

It is easier

07

Does the Json & CSV formats make it easier for you to complete analytics projects faster?

Yes CSV specifically is very widely used and I loved that capability.
